## CITY CENTRE PARKING MANAGEMENT PLAN SURVEY

The City of Spruce Grove has retained [Bunt & Associates Engineering Ltd.](#) to undertake the development of a Parking Management Plan for the City Centre area. This initiative was recommended as part of the recently approved [City Centre Area Redevelopment Plan](#).

The study and recommendations from this plan will allow the City to determine appropriate responses to current and future parking considerations as they affect parking across the City Centre area.

We want to continue hearing your thoughts on parking in the City Centre area of Spruce Grove! You are invited to provide your input by completing Survey #2. This survey is a continuation of our public engagement process, and the results will be used to help develop a parking management plan for the City Centre to manage parking needs for today and what is anticipated for future growth and revitalization of the area.

Survey ended at 12pm on October 19th, 2020.

Thank you to all those who participated. Results will be posted once made available.
